ROBERTO JACINTO ASINO

Senior Full-Stack Software Engineer | .NET • Azure • React | Agentic AI Developer
Quezon City, Philippines • +63 916-237-0611 • rjasino@live.com • https://www.linkedin.com/in/rjasino/ • https://github.com/rjasino

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 16+ years delivering enterprise systems across financial services, government, insurance, and education. Deep .NET/C# and Azure expertise, with modern React and Angular front ends. Builds and teaches agentic software-delivery workflows (spec-driven development, Claude Code, multi-provider LLM routing) and created the Agentic Systems Design (ASD) framework. Experienced modernizing legacy platforms into Azure-hosted, cloud-native architectures for government and multinational clients.

TECHNICAL SKILLS

Languages: C# (15 yrs) • JavaScript (16 yrs) • HTML / CSS (16 yrs) • TypeScript (3 yrs) • Java (3 yrs, 2020–2024)

Backend & Frameworks: ASP.NET MVC / Web API (6 yrs) • Entity Framework (5 yrs) • Node.js (1+ yr) • Express (1 yr) • Laravel (1+ yr)

Front-End: React (3 yrs) • Angular (3 yrs, 2020–2024) • Next.js (1 yr) • Bootstrap (5 yrs) • TailwindCSS (1 yr)

Databases: SQL Server (15 yrs) • SSRS (3+ yrs) • Oracle (3 yrs, 2020–2024) • SQLite (5 yrs) • PostgreSQL (2 yrs) • MongoDB (1 yr) • Prisma (2 yrs) • ACID

Cloud & DevOps: Microsoft Azure (4 yrs) • Azure DevOps (5 yrs) • Azure Pipelines (2 yrs) • Azure Function Apps (2 yrs) • Azure Logic Apps (2 yrs) • Docker (2 yrs) • Podman (1 yr) • GitHub Actions

Testing & Tools: Postman (10 yrs) • Git (7 yrs) • SVN (5 yrs) • NUnit (2 yrs) • xUnit (1 yr) • Selenium .NET (1 yr) • Swagger (1 yr)

Practices: SOLID • OOP • Agile / Scrum • REST API Design • GraphQL • UML / System Modeling • CI/CD • Spec-Driven Development

AI & AGENTIC ENGINEERING

Agentic Tools: Claude Code (with custom slash commands, CLAUDE.md / rules architecture, and MCP integration • OpenCode • GitHub Copilot • ChatGPT • Gemini • NotebookLM

Methodologies: Agentic Systems Design (ASD): Agentic Workflow Design, Spec-Driven Development, Agentic Process Automation, Harness Engineering • Repository-as-memory (AGENTS.md, ADRs, session logs) • GitHub Spec Kit • OpenSpec • BMad

Model Strategy: Multi-provider model routing (Claude, Gemini, DeepSeek) for cost optimization • Context-window management • GitHub Actions / Docker CI/CD for AI-assisted projects

WORK EXPERIENCE

Senior Full Stack Developer July 2024 – Present

Full Scale Teams PH (offshore engineering for US-based clients)

Stack: .NET, C#, React, MSSQL, Azure Function Apps, Azure Logic Apps, Azure DevOps, Azure Pipelines

- Architected a financial integration API on Azure Function Apps and WebJobs, connecting the client's internal financial system to external third-party services.
- Built and continuously tuned Azure Logic Apps workflows automating business processes, adapting pipelines to evolving client requirements.
- Led full-stack development of a Treaty Management System (.NET API, React SPA) providing real-time contract tracking.
- Reverse-engineered and modernized legacy systems into Azure-hosted, cloud-native architectures.
- Apply spec-driven, AI-assisted development with GitHub Copilot in day-to-day delivery.
- Collaborate in daily Agile stand-ups with cross-functional teams to deliver on time and on scope.

College Instructor (Part-Time) May 2025 – Present

CIIT College of Arts and Technology

Stack: Laravel, MERN (MongoDB, Express, React, Node.js), Next.js

- Design and deliver full-stack web development modules and lesson plans covering the full lifecycle, from requirements to deployment, to 60 students per term.
- Introduced AI-assisted development (GitHub Copilot) into the curriculum and developed teaching materials on agentic workflow design and spec-driven development.

- Advise student capstone and thesis projects, including AI-driven systems, on software architecture, API design, and development best practices.

Solutions Developer November 2020 – June 2024

PCCW Solutions Inc. (Lenovo PCCW Solutions Inc.)

Stack: .NET, C#, Java, Oracle, MSSQL, Angular, Azure DevOps, SSRS, .NET Selenium

- Engineered core modules for the Securities and Futures Commission (SFC) Information System, a regulatory platform for a Hong Kong statutory body, as part of the LENS Team.
- Developed the Urine Test Management Module and full supporting documentation for the Inmates Management System (iCRMS) of the Hong Kong Correctional Services Department.
- Built a Claim Information System for Cigna HK, streamlining insurance claims processing.
- Maintained and optimized SSRS processes behind daily SFC regulatory reports, ensuring high availability and data integrity.
- Led QA test automation with .NET Selenium, building regression frameworks that later used in other projects.

.NET Developer February 2020 – October 2020

Codebiz IT Solutions

Stack: .NET, C#, JavaScript, jQuery, Bootstrap, SQL Server

- Developed the Deduction and Adjustment modules, with supporting financial and audit reports, for the Philippine National Police (PNP) Pension Management System.
- Wrote a data migration script transferring beneficiary records from the legacy system with zero data loss.

Web Developer November 2018 – December 2019

Audition Magic

Stack: React.js, Ruby on Rails, JavaScript, HTML / CSS, Linux

- Built an in-house web application from the ground up with a React.js front end and Ruby on Rails API, then maintained and extended it.

Business Application Developer February 2017 – December 2018

Birches Group LLC

Stack: C#, .NET Framework, ASP.NET MVC, Web API, Azure, WPF, jQuery, JavaScript, SQL Server

- Built Indigo, the in-house Survey Management System supporting global compensation surveys for a multinational HR consulting firm.
- Automated report generation and email distribution with SQL Server Jobs and DatabaseMail, eliminating manual reporting effort.
- Maintained back-office tooling for client access provisioning and subscription management, and contributed to the public website (ASP.NET MVC).

.NET Programmer November 2012 – February 2017

Marine Benefits Assistance and Services Inc.

Stack: C#, .NET Framework, ASP.NET MVC, Web API, jQuery, JavaScript, SQL Server, RDLC Reports

- Developed and maintained Gjenesis, an Insurance Management System covering policy management, claims, and member benefits for marine-industry clients.
- Engineered Arbiter, a proprietary data access layer that standardized database interactions across the company's application suite.
- Automated reporting and email distribution with SQL Server Jobs and DatabaseMail; built the backend for the public website (ASP.NET MVC).

Earlier Experience 2010 – 2012

- **Web Developer**, Primover Consultancy Services (Kimberly-Clark Philippines), Apr–Oct 2012: built Umbraco CMS consumer sites for Poise (Malaysia) and Huggies (India) and maintained a procurement intranet.
- **Programmer**, Systems and Software Consulting Group Inc., Apr 2010 – Apr 2012: contributed to an HRIS deployed at TIP, Vallacar Transit Inc., and PNU; authored SRS documents with use case, ER, and activity diagrams.

INDEPENDENT PROJECTS & COMMUNITY

- **Agentic Systems Design (ASD) Framework** (Creator): formalized and documented Agentic Workflow Design, Spec-Driven Development, Agentic Process Automation, and Harness Engineering; applied in own projects and used as teaching material. [Google Drive Link]
- **Agentic Developer PH** (YouTube channel): teaches agentic workflow practices to Filipino developers. [YouTube]

- **AFP Finance Team Training:** delivered a specialist web development training and produced a formal student assessment report.

CERTIFICATIONS

OpenAI Academy: AI Foundation • Applied AI Foundation • Agent and Workflow • Path Completion 2026

EDUCATION

Bachelor of Science in Computer Science, Adamson University, Manila 2010
